

Important announcement

LEAD FREE relays and sockets by Good Sky

June 21, 2004

Dear customers,

According to the Directive of The European Union for the elimination and restriction of using hazardous substances (ROHS) for the electric and electronic products and packing, since last year Good Sky has been taking actions to remove the use of below hazardous substances in particular,

- ◆ **Lead**
- ◆ **Mercury**
- ◆ **Cadmium**
- ◆ **Hexavalent chromium**
- ◆ **Polybrominated biphenyls**
- ◆ **Polybrominated diphenyls ethers**

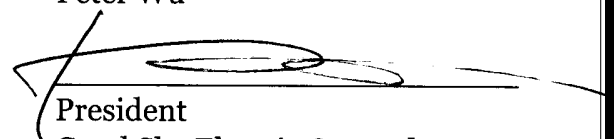

Good Sky is now formally announcing that we are taking following procedures to convert our relays and sockets into LEAD FREE, important steps are,

1. Good Sky is working on to make its products of relays and sockets in conformity to the statement of Directive, our goal is to have this conformity from January 1 , 2005.
2. In our internal operation starting from September 1, 2004, we will use none of hazardous substances mentioned above by ourselves and from our suppliers, the LEAD FREE project is to be implemented in all our production products and packing for our factory production operation.
3. Please refer to our website <http://www.goodsky.com.tw> for all the information of LEAD FREE certification documents and packing identification for all our relay series and sockets.

The conversion of LEAD FREE project of our relays and sockets will not impact your current processes, applications also we are pleased to note that the change outlined in this letter will not affect the sales price of our products.

I remain
Sincerely yours

Peter Wu

President
Good Sky Electric Co., Ltd
